ABOUT

Natural-born innovator and problem solver that specializes in graphic/web design and development. After majoring in industrial design in early 2019, I've developed a strong interest for creating digital products and its own unique process of critical thinking through programming. I'm currently working on various client and personal projects ranging from graphic designs to platform-free responsive websites.

HISTORY

United States Air Force

Jet Engine Mechanic
Panama City, Florida (Majority of my Career)
October 2007 - February 2017

Troubleshoot, repaired, inspected, installed, and tested various Jet engines for the F-22 Raptor and the C-117 Globemaster. Performed duties as shift lead, and supervisor at craftsman level.

Comcast

Residential Technician
Seattle, WA
July 2015 - March 2016

Troubleshoot, repaired, and installed various products and services for customers. Obtained a great deal of knowledge and understanding in how high speed internet works from a hardware perspective.
